

Amanda Pucher

Product Engineer – Innovation

Amanda Pucher is a Product Engineer at Lear Corporation, responsible for material development of FlexAir. Graduating from Michigan State University with a degree in Chemical Engineering, Amanda has worked for Lear for 4 years in their automotive seat engineering division focused on design, development, and launch of seating applications for North American OEMs. Most recently, Amanda has used her chemical engineering background by joining the innovation team to develop and launch FlexAir, a foam replacement solution that provides greater environmental benefits with superior comfort and durability performance. In her free time, she enjoys golfing and spending time outside.
