

Speaker's Bio.

Name: Piergiovanni Ercoli Malacari

Title: Product and application
development

Company: IMIFabi Spa - Italy

Experience:

He has been working in the thermoplastic materials field since 1990. He has acquired experience in both production and development areas. He has worked for several years in compounding (R&D and technical assistance) and plastic manufacturing (rigid sheets extrusion, medical tubing, plastic recycling). Currently, at IMI-FABI, he is responsible for product development and the application of IMI-FABI talc in the thermoplastic field. Additionally, he has authored several technical papers on talc applications in polymers.

Educational Background:

Graduated from “Politecnico di Milano” in Italy as a chemical engineer, with expertise in thermoplastics materials and their applications and modifications.
