

## **Bio:**

**Tariq Syed**, Tariq Syed: Staff Scientist and Product Whisperer at SABIC, a Fortune 500 company (est. on the list: 2010). Holding an MSc in Chemical Engineering from IIT (Chicago-IL), he speaks fluent polymer physics, mechanics, and structural properties – and can even coax them into new product forms for demanding sectors like automotive. Consider him and other presenters as the guys who makes sure your car parts don't spontaneously disassemble. However, I am a student not an expert.
