

Changing The Perception Of Plastics One Classroom At A Time

"Music to my Ears"—Professor Majid Sarmadi, UW-Madison

Your demonstrations and enthusiastic presentation sparked scientific curiosity in students and provided information about the role of plastics in our modern life. It was music to my ear when students stayed longer and asked questions and inquired about careers in this field. As you know a couple of students requested a copy the video of your presentation. One student said “I want to show the video to my parents to show them why I am excited to go to into this field”. The impact that you made on 80 disadvantage students from southern Wisconsin, eight undergrad students as their chaperons and eight instructors is unbelievable! Everyone loved your program!
